DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-7, 9, 10-13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Svirchevski et al (US Patent NO 6,093,254).

Svirchevski et al teach a method as claimed. See entire document, especially Figures 4, 5, 6a and the related description.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

- 5. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Svirchevski et al in view of Krussel et al (US Patent No 5,723,019).

Svirchevski et al teach the claimed method except for specifically claimed water delivery times.

Krussel et al teach (see et least column 5, line 63 – column 6, line 58 and column 4, lines 24-34) that such parameters were conventional in wafer cleaning utilizing the same equipment (DSS-200TM of OnTrak Systems, Inc.) as WO 97/13590.

It would have been obvious to an ordinary artisan at the time the invention was made to employ the conventional for the art operation parameters in the method of Svirchevski et al with reasonable expectation of adequate results.

7. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Svirchevski et al in view of Itzkowitz (US Patent NO 5,675,856).

Svirchevski et al teach the claimed method except for the specifically claimed rotation speed.

However, Itzkowitz teaches that such rotation speed was conventional for wafer cleaning in a double brush box.

It would have been obvious to an ordinary artisan at the time the invention was made to rotate wafers in the method of Svirchevski et al with a speed conventional for such processes with reasonable expectation of success.

Response to Arguments

8. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Markoff whose telephone number is 571-272-1304. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
